# ANALYTIC SUBJECT INDEX

*Antiferromagnet, quasi-one-dimensional*
– Magnetization process of a quasi-one-dimensional Ising antiferromagnet with an applied transverse field - Kaneyoshi **144A** (1987) 140
*Atom–mode interaction*
– $N$-level atom and $(N-1)$ modes generalized models and multiphonons - Abdel-Hafez et al. **144A** (1987) 530

*Bifurcation point crossing* (see *Branch selectivity*) **144A** (1987) 574
*Branch selectivity*
– —in a system crossing a bifurcation point: Fokker–Planck equation approach - Kumar and Menon **144A** (1987) 574
*Broken rotational invariance*
– Density–stress correlations in fluids and solids with— - Wagner **144A** (1987) 495

$(CH)_x$ (see *Polyacetylene model*) **144A** (1987) 418
*Clusters* (see *Fractal universe*) **144A** (1987) 257
*Coherence, quantum*
– Quantum coherence and tunnelling in a double-well potential in a thermal environment: dynamics of the weakly coupled spin–boson system - Dekker **144A** (1987) 453
*Confinement* (see *Dia-electric medium*) **144A** (1987) 105
*Critical correlations* (see *Ising model, Z-invariant inhomogeneous*) **144A** (1987) 44
*Critical dimensionality* (see *Destruction of long-range order*) **144A** (1987) 192
*Crystals, nonprimitive*
– A quantum field theory of lattice dynamics and melting in nonprimitive crystals - Kitamura **144A** (1987) 29

*Density–stress correlations*
– —in fluids and solids with broken rotational invariance - Wagner **144A** (1987) 495
*Destruction of long-range order*
– —in quantum ferroelectrics via random field fluctuations - Busiello et al. **144A** (1987) 192
*Dia-electric medium*
– A hypothetical model of confinement in a— - Elfiqi **144A** (1987) 105
*Diamond structures* (see *Crystals, nonprimitive*) **144A** (1987) 29
*Dimer problem*
– —solved by Vdovichenko's method - Morita **144A** (1987) 118
*Dipole–dipole interaction*
– Ground state of an infinite low-dimensional system of dipoles on a lattice with arbitrary rhombicity angle - Brankov and Danchev **144A** (1987) 128
*Dissipative fluxes*
– A phenomenological non-equilibrium theory for the thermodynamics of Kelvin bodies - Valenti **144A** (1987) 211

*Dissipative quantum mechanics*
– —: a proof of dynamical consistency - Dekker **144A** (1987) 445

*Electrical conductivity*
– The—for inhomogeneous electric fields by the Liouville operator method - Loss and Thellung **144A** (1987) 17
*Equivalence principle*
– —in statistical mechanics - Gutkin **144A** (1987) 430
*Erratum*
– —to Physica 131A (1985) 506, Diffusion and thermal diffusion in some dilute binary gaseous systems between 195 and 400 K: tests of several asymmetric potentials using the infinite order sudden approximation - Trengove et al. **144A** (1987) 254
*Extended thermodynamics* (see *Gases, non-ideal*) **144A** (1987) 156

*Fluctuating phases*
– Lattice mixtures of— - Yukalov **144A** (1987) 369
*Fokker–Planck equation*
– Branch selectivity in a system crossing a bifurcation point:—approach - Kumar and Menon **144A** (1987) 574
*4f electron systems*
– Zeeman effect on anisotropic— - Maeda and Sugimoto **144A** (1987) 299
*Fractal universe*
– The fractal structure of the universe: correlations of galaxies and clusters and the average mass density - Pietronero **144A** (1987) 257
*Friction tensor*
– Drag on a sphere moving slowly through a fluid in elongational flow - Bedeaux and Rubi **144A** (1987) 285

*Galaxies* (see *Fractal universe*) **144A** (1987) 257
*Gap equation* (see *Superconductivity*) **144A** (1987) 353
*Gases, non-ideal*
– Extended thermodynamics of non-ideal gases - Kremer **144A** (1987) 156
*Geodesics*
– —in the isotropic universe - Chaliasos **144A** (1987) 390

*Heat-current time correlation* (see *Plasma, magnetized*) **144A** (1987) 513
*Heisenberg model* (see *Heterophase mixture*) **144A** (1987) 369
*Hermitian conjugation* (see *Two-body tensor operator*) **144A** (1987) 235
*Heterophase mixture*
– Lattice mixtures of fluctuating phases - Yukalov **144A** (1987) 369

*Induced forces* (see *Friction tensor*) **144A** (1987) 285
*Interaction round-a-face* (see *Equivalence principle*) **144A** (1987) 430
*Inverse scattering technique* (see *Polyacetylene model*) **144A** (1987) 418
*Irreversible extended thermodymamics*
– Applications of reciprocity to non-linear extended thermodynamic kinetic equations - Nettleton **144A** (1987) 219
*Irreversible extended thermodynamics* (see *Kelvin bodies*) **144A** (1987) 211
*Ising antiferromagnet*
– Magnetization process of a quasi-one-dimensional—with an applied transverse field - Kaneyoshi **144A** (1987) 140

*Ising model, anisotropic*
– Ising models with anisotropic interactions: stationary nonequilibrium states with a nonuniform temperature profile - Garrido and Marro **144A** (1987) 585
*Ising model, random field*
– Thermodynamical properties of the random field Ising model - Borges and Silva **144A** (1987) 561
*Ising model, Z-invariant inhomogeneous*
– Critical correlations in a $Z$-invariant inhomogeneous Ising model - Au-Yang and Perk **144A** (1987) 44
*Ising model* (see *Heterophase mixture*) **144A** (1987) 369
*Isotropic universe*
– Geodesics in the— - Chaliasos **144A** (1987) 390

*Jumping probability* (see *Noise theory*) **144A** (1987) 481

*Kelvin bodies*
– A phenomenological non-equilibrium theory for the thermodynamics of— - Valenti **144A** (1987) 211
*Kink* (see *Polyacetylene model*) **144A** (1987) 418

*Large scale structures* (see *Fractal universe*) **144A** (1987) 257
*Lattice dynamics and melting*
– A quantum field theory of—in nonprimitive crystals - Kitamura **144A** (1987) 29
*Liouville operator method* (see *Electrical conductivity*) **144A** (1987) 17

*Metal in an electric field*
– The electrical conductivity for inhomogeneous electric fields by the Liouville operator method - Loss and Thellung **144A** (1987) 17
*Metallic structures, one-dimensional* (see *Superconductivity*) **144A** (1987) 353
*Migdal transformation*
– Analysis of the—for models with planar spins on a two-dimensional lattice - Sokalski et al. **144A** (1987) 322
*Mode-coupling theory*
– Small-wavenumber divergency in the mode-coupling amplitudes for the heat-current time correlation function of a one-component plasma in a magnetic field - Schoolderman and Suttorp **144A** (1987) 513
*Multiphoton processes* (see *Atom–mode interaction*) **144A** (1987) 530

*N-level atom*
– —and $(N-1)$ modes generalized models and multiphonons - Abdel-Hafez et al. **144A** (1987) 530
*Noise,weak*
– Nondifferentiable potentials for nonequilibrium steady states - Jauslin **144A** (1987) 179
*Noise theory*
– A theory of noise based on generalized random walks - Hara et al. **144A** (1987) 481
*Non-integrability* (see *Toda lattices*) **144A** (1987) 310
*Nonequilibrium stationary states*
– Ising models with anisotropic interactions: stationary nonequilibrium states with a nonuniform temperature profile - Garrido and Marro **144A** (1987) 585
*Nonequilibrium steady state*
– Nondifferentiable potentials for—s - Jauslin **144A** (1987) 179

*One-body tensor operator*
– Comments on the properties of one- and two-body double tensor operators - Tuszyński and Chatterjee **144A** (1987) 235

*Oscillator, quantum*
– Dissipative quantum mechanics: a proof of dynamical consistency - Dekker **144A** (1987) 445

*Parity reversal* (see *One-body tensor operator*) **144A** (1987) 235
*Percolation* (see *Random networks*) **144A** (1987) 1
*Periodic configurations* (see *Two-dimensional dipole system*) **144A** (1987) 128
*Phase diagrams* (see *Ising model, random field*) **144A** (1987) 561
*Phase-space, quantum mechanical*
– A precaution needed in using the phase-space formulation of quantum mechanics - Wang and O'Connell **144A** (1987) 201
*Plasma, magnetized*
– Small-wavenumber divergency in the mode-coupling amplitudes for the heat-current time correlation function of a one-component plasma in a magnetic field - Schoolderman and Suttorp **144A** (1987) 513
*Polaron solutions* (see *Polyacetylene model*) **144A** (1987) 418
*Polyacetylene model*
– General soliton and polaron solutions in the continuum—through inverse scattering technique - Kundu **144A** (1987) 418
*Potential, double-well* (see *Spin–boson system*) **144A** (1987) 453
*Potential, nondifferentiable*
– Nondifferentiable potentials for nonequilibrium steady states - Jauslin **144A** (1987) 179

*QED (QCD)* (see *Dia-electric medium*) **144A** (1987) 105
*Quantum ferroelectrics*
– Destruction of long-range order in—via random field fluctuations - Busiello et al. **144A** (1987) 192
*Quantum field theory* (see *Lattice dynamics and melting*) **144A** (1987) 29

*Raman scattering, collective*
– Collective spectral properties of Raman scattering - Bogolubov et al. **144A** (1987) 503
*Random field fluctuations* (see *Quantum ferroelectrics*) **144A** (1987) 192
*Random networks*
– Self-avoiding walks on—of resistors and diodes - Marković et al. **144A** (1987) 1
*Random walks, generalized*
– A theory of noise based on generalized random walks - Hara et al. **144A** (1987) 481
*Random walks* (see *Dimer problem*) **144A** (1987) 118
*Rare-earth ions* (see *4f electron systems*) **144A** (1987) 299
*Reciprocity relations* (see *Irreversible extended thermodymamics*) **144A** (1987) 219
*Renormalization group* (see *Self-avoiding walks*) **144A** (1987) 1
*Rhombic lattice* (see *Two-dimensional dipole system*) **144A** (1987) 128
*Robertson–Walker metric* (see *Isotropic universe*) **144A** (1987) 390

*Schrödinger quantum mechanics*
– A precaution needed in using the phase-space formulation of quantum mechanics - Wang and O'Connell **144A** (1987) 201
*Self-avoiding walks*
– —on random networks of resistors and diodes - Marković et al. **144A** (1987) 1
*Site (edge) type models* (see *Equivalence principle*) **144A** (1987) 430
*Soliton solutions* (see *Polyacetylene model*) **144A** (1987) 418
*Sphalerite* (see *Crystals, nonprimitive*) **144A** (1987) 29

*Sphere–fluid interaction*
– Drag on a sphere moving slowly through a fluid in elongational flow - Bedeaux and Rubi **144A** (1987) 285
*Spin–boson system*
– Quantum coherence and tunnelling in a double-well potential in a thermal environment: dynamics of the weakly coupled— - Dekker **144A** (1987) 453
*Stokes lines* (see *Raman scattering, collective*) **144A** (1987) 503
*Superconductivity*
– —of one-dimensional metallic structures - Šetrajčić et al. **144A** (1987) 353
*Superfluid, charged*
– On the hydrodynamics of a charged superfluid - Krasnikov **144A** (1987) 604

*Three-level atoms* (see *Raman scattering, collective*) **144A** (1987) 503
*Time reversal* (see *One-body tensor operator*) **144A** (1987) 235
*Toda lattices*
– On the non-integrability of some generalized— - Yoshida et al. **144A** (1987) 310
*Transition temperature* (see *Ising antiferromagnet*) **144A** (1987) 140
*Tunnelling, quantum*
– Quantum coherence and tunnelling in a double-well potential in a thermal environment: dynamics of the weakly coupled spin–boson system - Dekker **144A** (1987) 453
*Two-body tensor operator*
– Comments on the properties of one- and two-body double tensor operators - Tuszyński and Chatterjee **144A** (1987) 235
*Two-dimensional dipole system*
– Ground state of an infinite low-dimensional system of dipoles on a lattice with arbitrary rhombicity angle - Brankov and Danchev **144A** (1987) 128
*Two-dimensional spin lattice*
– Analysis of the Migdal transformation for models with planar spins on a two-dimensional lattice - Sokalski et al. **144A** (1987) 322

*Vdovichenko's method* (see *Dimer problem*) **144A** (1987) 118

*Ward–Takahashi relation* (see *Crystals, nonprimitive*) **144A** (1987) 29

*Zakharov–Shabat problem* (see *Polyacetylene model*) **144A** (1987) 418
*Zeeman effect*
– —on anisotropic 4f electron systems - Maeda and Sugimoto **144A** (1987) 299
*Ziglin's theorem* (see *Toda lattices*) **144A** (1987) 310
